### DETAILED ACTION

1. Claims 1-30 of U. S. Application 10/071,472, filed 2/8/2002 are presented for examination. Claims 1-30 are allowed.
2. Process claims 1-14 were analyzed under 35 USC 101. It is recognized that, in order to be statutory, a process claim must be 1) tied to a particular machine or apparatus, or 2) it transforms a particular article into a different state or thing. *In re Bilski*, 88 USPQ2d 1385 (2008). It is also recognized that a general purpose computer may be converted into a particular computer through the operation of software on the computer. *In re Alappat*, 31 USPQ2d 1545 (1994). For the instant invention, it is clear that the process must be carried out via software operating on a computer. Claim 1 requires that the method must be carried out on a computer.. As such, the process is tied to a particular machine and meets the *Bilski* test.
3. Claims 15-28 and 29 are statutory because they require physical hardware.
4. Program product claim 30 is statutory because the medium only encompasses tangible medium (see amendment to the specification of 3/23/2009).
5. The following is an examiner's statement of reasons for allowance with respect to the prior art: The prior art of record discloses collaborative and concurrent CAD design (see patent 6,629,065, for example). However, the prior art of record does not disclose or suggest "determining, based on the behavioral parameters and without user involvement, which body partitions from the predefined set correspond to individual design features of the object;" (see amendment of 8/21/2008 which includes the changes of 12/26/2007), in the context of the claims, and as defined in the specification (see figure 6 and corresponding text).

Art Unit: 2128

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
